

# Fresh Tuna

Our fishing process begins when the boat manned by approximately 24 people set sail, ready for a journey that can last up to 60 days in the open sea. With great care we make a choice of the best and mature of these specimens and then import them to Canada. [Read More](#)

## Product Description

That we can talk about tuna, the most marketed seafood product of all but with an immense acceptance among all since it is not only ideal for diets but also has high levels of minerals and vitamins, improves cardiovascular function, protects the skin and memory ; and these are just a few of the benefits of tuna. Our tuna fishing takes place in tropical seas, most of the time very far from shore. Our fishing process begins when the boat manned by approximately 24 people set sail, ready for a journey that can last up to 60 days in the open sea. With great care we make a choice of the best and mature of these specimens and then import them to Canada.
